LAST-MINUTE EXAM PREP

Class 11 Mathematics Master Revision Hub

Clean, beautifully formatted formulas, solved expected problems, exam traps, and quick self-tests for all 7 chapters.

7 Complete Chapters | Instant Web View | Standalone PDF Copies

Exam Tomorrow? Suggested Fast Study Flow:

Select any chapter below to review its key formulas, study the high-yield problems, and review the exam traps so you don't lose marks on silly mistakes.

Select a Chapter to Revise

CHAPTER 1 — 20m

Sets

Subsets, Power Set (2^n), intervals of $\mathbb{R}$, De Morgan's Laws, and 3-set survey word problems.

Notes | PDF

CHAPTER 2 — 25m

Relations & Functions

Cartesian products, total relations (2^{pq}), standard graphs (Modulus, Signum, GIF), and Domain & Range.

Notes | PDF

CHAPTER 3 — 35m

CHAPTER 4 — 25m

Trigonometric Functions

Radians, ASTC quadrant rules, compound angles, double/triple angles, and C-D transformation identities.

Notes PDF

Complex Numbers

Powers of i, conjugate $\bar{z}$, modulus $|z|$, multiplicative inverse, $a+ib$ form, and quadratic roots.

Notes PDF

CHAPTER 5 20m

Linear Inequalities

Inequality sign reversal on negative division, algebraic solutions, and real line intervals.

Notes PDF

CHAPTER 6 30m

Permutations & Combinations

Counting principle, repetition factorials, bundle & gap methods, and committee selections.

Notes PDF

CHAPTER 7 25m

Binomial Theorem

General expansion $(a+b)^n$, $(n+1)$ terms, numerical approximations, comparing powers, and divisibility proofs.

Notes PDF
